LAUREN DAI

Cocoon

Lauren is the COO & co-founder of Cocoon, the platform that makes managing employee leave instant, simple, and big-hearted for HR teams and employees alike. With Cocoon, employees can design their leave plan in private, notify HR when they're ready, and rest easy knowing that all their paperwork will be submitted for them. Employers don't have to lift a finger when it comes to compliance, claims, or payroll calculations.

Prior to starting Cocoon, Lauren was integral to building the growth organization at Stripe. She graduated with honors from Harvard University with a degree in Economics.
